In the claims:

All of the claims standing for examination are presented below with appropriate status indication.

1. (Currently amended) An ~~internet enabled~~ interactive interface in a display provided by software executed by a computerized appliance from a machine-readable medium, comprising:

a window provided by a first Internet-based service through a first link to that service;

a first frame in ~~an on-screen~~ the window ~~of a graphical user interface, wherein said first frame encapsulates~~ encapsulating a resource from a third-party internet based service, separate from the first Internet-based service, as requested by a user through ~~an internet enabling software~~ the first Internet-based service, enabling the user to initiate a transaction with the third-party service; and

a second frame in said ~~on-screen~~ window, wherein said second frame ~~comprises~~ displays user-specific information, provided by the first Internet-based service, that is related to content provided from said resource from the third-party Internet-based service.

2. (Currently amended) The ~~internet enabled~~ interactive interface of Claim 1, further comprising:

a first direct communication link between the software and said third party internet based service to provide an interface for said user with said third-party internet based service through said first frame.

3. (Currently amended) The ~~internet enabled~~ interactive interface of Claim 1, further comprising:

a second direct communication link between ~~said internet enabling~~ the software and a host portal that provides a bill management service.

4. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 3, wherein said request is initiated at said host portal by said user to request said resource.

5. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 1, wherein said user specific information comprises a bank balance.

6. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 1, wherein a request for said resource by said user automatically deep-links said internet enabling software directly to said resource.

7. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 1, wherein said content comprises billing information associated with said user.

8. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 1, wherein said user-specific information comprises personalized information associated with said user.

9. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 8, wherein said personalized information comprises a name of said user.

10. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 1, further comprising:

a third frame in said on-screen window, wherein said third frame encapsulates a second resource from ~~another~~ <u>a second</u> third-party internet based service as requested by said user through ~~said internet enabling~~ <u>the</u> software, wherein said second frame comprises ~~other~~ <u>second</u> user-specific information that is related to ~~other~~ <u>second</u> content provided from said second resource.

11. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 1, wherein said first frame further comprises a user-interface control element.

12. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 10, wherein said user-interface control element comprises a control button.

13. (Currently amended) The ~~internet enabled~~ <u>interactive</u> interface of Claim 10, wherein said user-interface control element comprises a link.

14 – 34. (Cancelled)
